

2e. Performance Measures

[Performance Measures](#) (PMs) (45 CFR 2422.530-45 and CRF 2522.650) are used to report AmeriCorps achievements during the program year. During the grant application and contract approval process, the program develops, and Nevada Volunteers and CNCS approve, national performance measures and/or program-identified performance measures to be reported to CNCS. You will report quarterly on your progress in OnCorps. Performance Measures must be entered correctly in OnCorps or reports pulled by Nevada Volunteers for reporting to CNCS are incorrect. Please make sure to enter the Performance Measure data according to the tutorial in OnCorps under the help menu ribbon. It is essential that data reported to Nevada Volunteers and CNCS be of high quality and we encourage you to take the [CNCS Data Quality Self-Assessment](#).
